

PRODUCT.OVERVIEW

doors for agriculture and industry

EN

MADE IN HOLLAND

www.beekdeuren.nl

Why aluminium?

> **Rigid**

does not rust, rot, crack or deform.

> **Flexible**

great freedom in design and easy to work (by machine).

> **Long service life**

resistant to high temperatures and intensive use.

> **Easy maintenance**

standard in plain aluminium or protected for years with extra powder coating.

> **Outstanding price-quality relationship**

hardwearing basic material in combination with high quality and finish.

> **Kind to the environment**

product can be recycled and is made of 40% recycled aluminium from the start.

Our guarantees

> **ten years on aluminium frame and door leaf surrounds**

> five years on hinges and locks

> five years on door leaves

Ask us for the general conditions that apply to our products with respect to delivery and guarantee among other things.

Also check our website!

FOREWORD

Beek Deuren has been involved in producing and supplying doors for agriculture and industry since 2009. Over this period, the company has expanded to a team of approximately 10 dedicated staff who work on the widest range of projects in the Benelux on a daily basis.

Flexible and professional

The limited size of our company means that we can operate flexibly, the lines of communication are short, and changes in the process and ordering process can be quickly anticipated. As a result, we are able to work efficiently to ensure competitive prices, and the risk of additional work is sharply reduced. Our drawing packages **Tekla & AutoCAD** allow us to anticipate increasing demand for **BIM** with the aid of, among others, **IFC files** and **3D models**.

Requirements

Apart from the fact that Beek Deuren sets **stringent requirements** for the doors supplied, the requirements of **municipal aesthetics** are constantly being raised. Beek Deuren's doors fully comply with these requirements and even run ahead of them.

Application

The doors can be installed both **inside and outside**. The doors are manufactured entirely made to measure in our **own workshop**. Beek Deuren supplies sliding doors, wicket doors and overhead doors, among others, of almost all sizes. The sliding doors can be manufactured with either top or bottom rollers.

Finish

Standard doors are made of plain aluminium. If required, the doorframes can be **powder-coated** to any desired **RAL colour**. This powder coating gives the door an attractive finish and ensures a hardwearing, maintenance-free, **scratch and impact-resistant** product.

Materials

We make the frame and the surround of the door out of **high-quality aluminium** with the result that they are **strong and hardwearing**. The profiles designed by us are low weight and provide the doors with great stability. We have an appropriate solution for every wind region.

We fill the intervening space with an anti-draught brush profile or a rubber seal. We make the door leaves of **sandwich panels** with an **HPS coating**. If required, we can also make the door leaf out of trapezoidal sheet or wood, and our doors can be painted in virtually any RAL colour.

WORKING METHOD

1. Quotation on standard

Would you like to place a quick order for standard Beek Deuren articles? Then we will try to submit a quotation within 24 hours (on working days). This quotation will contain a description of the products and the relevant options.

2. Quotation for custom work

We can convert a request agreed with you into a customised quotation. By this we understand:

measurement & advice on site, recording requirement and wishes

process request via 3D Tekla, SolidWorks or 2D AutoCAD model drawing package

option of visiting showroom in Wekerom

option for customised products & developments

3. Order confirmation

Once you are in agreement with our quotation, this is changed to an order confirmation. This will be sent to you for approval. The conditions of delivery such as delivery time and guarantee, among other things, will be shown on it.

4. Production

Your product will be manufactured by us in Wekerom using a combination of skilled staff and the latest techniques. For example, we have a CNC milling machine and a 2-headed computer-guided sawing machine, among other equipment.

5. Transport

The product will be neatly packed up and delivered with the accompanying articles in a box. The order will be placed on pallets and delivered to your home if required.

6. Installation

If you would like our doors to be installed, they will be delivered carefully to you and installed by our skilled technicians. Our own equipment, such as a hydraulic platform, is among the options.

SVGD 60/80

Sliding fully glazed panel door

These fully glazed doors with panel strip are suited to every application and provided with outstanding insulating properties. They let a great deal of natural light into your barn in this way, creating pleasant conditions for people and animals.

Benefits for you

- > standard 7-mm laminated glazing
- > robustly welded tubular frame
- > 40-mm sandwich panel strip
- > constructed with single or double leaf

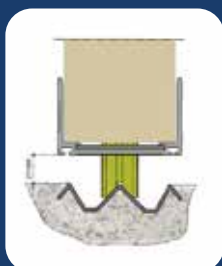

Standard finish and supplied incl.

- > 7-mm laminated glazing
- > ROB rails, wheels & stoppers
- > bottom guide with boats
- > surface-mounted hand grips
- > anti-draught brushes on the side posts
- > door assembly
- > single bottom row panel strip

SVDG door options

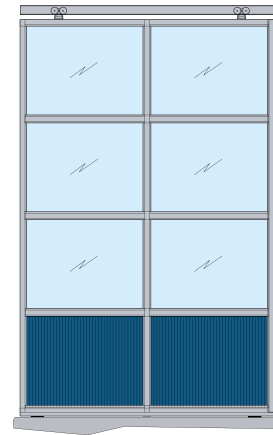

- > insulated glazing 22 mm
- > electrically powered
- > built-in LPDL wicket door
- > built-in cooling grating
- > profiles with powder coating
- > pin locking
- > triple or double panel strip
- > bird-deterrent strip
- > lowered wheels
- > your own section division (and dimensions)
- > made with bottom rollers
- > rain cover in colour coating
- > glass beading coated to colour

*Our basic profile:
option of top roller with lower profile,
adjustable and for every door width:*

SVGD 60 | 60 mm

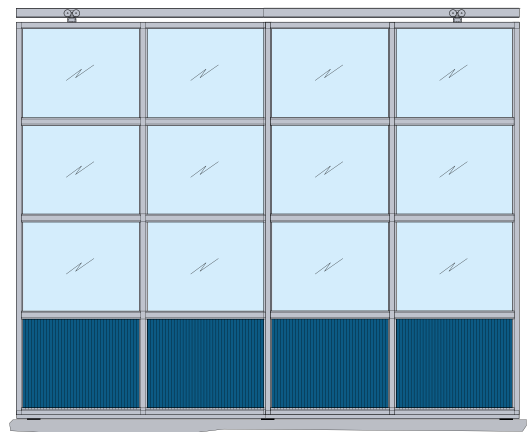

from 2 x 2 up to 3 x 3 m (W x H)

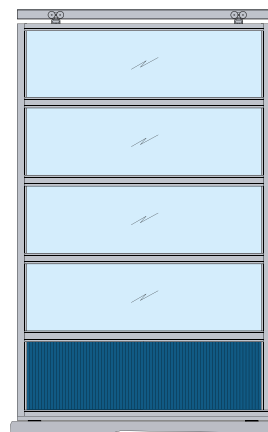

Tubular 60 x 60 mm plain aluminium window frame

SVGD 80 | 80 mm

from 3 x 3 up to 6 x 6 m (W x H)

Tubular 50 x 80 mm plain aluminium window frame

*Option: large horizontal
light surfaces*

SPD 40/60

Sliding panel doors

Simple sliding doors, made as compact as possible and easy to install. For use both inside and outside. Provided with sandwich panels and plain aluminium profiles.

Benefits for you

- > sandwich PIR panels with good insulating properties
- > standard HPS coating

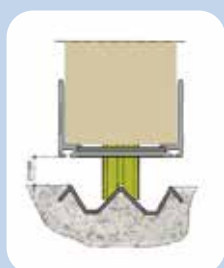

Standard finish and supplied incl.

- > rails & stoppers
- > (top) rails wheels
- > rubber hand recesses
- > anti-draught brushes on the side posts
- > door assembly

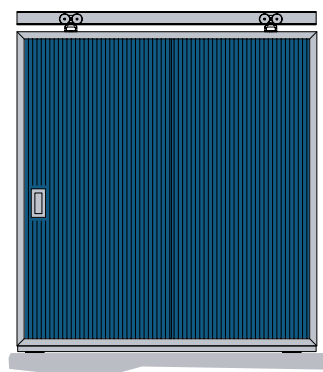

Options for SPD doors

- > bottom roller design
- > bottom guide (boats, wheels/embedded)
- > electrically powered
- > glass section
- > rain cover
- > cylinder lock
- > protective plate (stainless/alu/anti-slip)
- > wall brackets (types)
- > anti-draught brushes all round
- > profiles to colour (powder coating)
- > profiles in 304 stainless steel
- > panels to colour (sprayed on the basis of RAL)
- > pin locking (ground)
- > built-in wicket door
- > built-in cooling grating (with slide)

*Our basic profile:
option of top roller with lower profile,
adjustable and for every door width:*

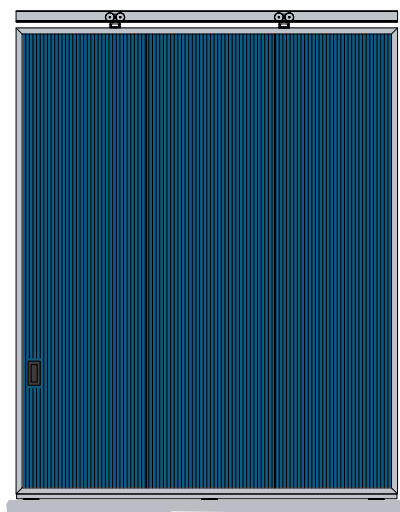

SPD 40 | 40 mm
from 1 x 2 up to 3 x 3 m (W x H)

U profile 46 x 35 mm plain aluminium frame and 40-mm panels

SPD 60 | 60 mm
from 3 x 3 up to 5 x 6 m (W x H)

U profile 66 x 50 mm plain aluminium frame and 60-mm panels

*also available with stainless steel surround

- > wall brackets (types)
- > anti-draught brushes all round
- > profiles to colour (powder coating)
- > profiles in 304 stainless steel
- > panels to colour (sprayed on the basis of RAL)
- > pin locking (ground)
- > built-in wicket door
- > built-in cooling grating (with slide)

*Our basic profile:
option of top roller with lower profile,
adjustable and for every door width:*

SPD 80 | 80 mm

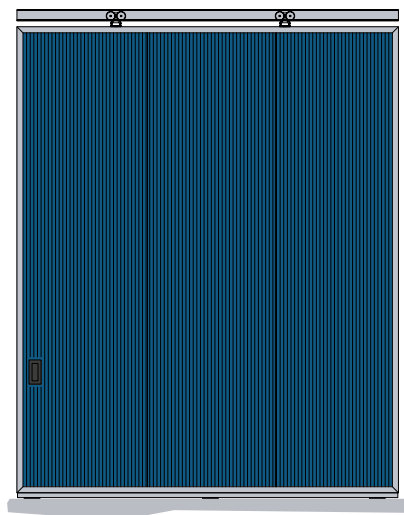

from 3 x 3 up to 6 x 7 m (W x H)

U profile 88 x 50 mm plain aluminium frame and 80-mm panels

SPD 100 | 100 mm

from 3 x 3 up to 6 x 9 m (W x H)

U profile 110 x 50 mm plain aluminium frame and 100-mm panels

*also available with stainless steel surround
ask about the possibilities*

SPD 100-ISO+ Sliding panel door

These extra insulated sliding doors are fitted with 100-mm-thick sandwich panels with a fire-retardant PIR hard foam core and a robust aluminium surround with rubber seal.

The door is made with bottom rollers and a top guide. This means it is ideal for cooling cells, storage places, warehouses and production rooms.

Benefits for you

- > tough Beek Deuren aluminium profile
- > good sealing by means of wear-resistant rubber profiles
- > high insulation value through 100-mm-thick panels
- > large door leaf dimensions possible

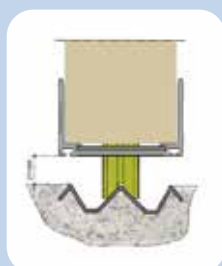

Standard finish and supplied incl.

- > top guide and stoppers
- > all-round rubber sealing
- > in-built rubber hand recess
- > with bottom rollers
- > pin locking
- > panels to colour

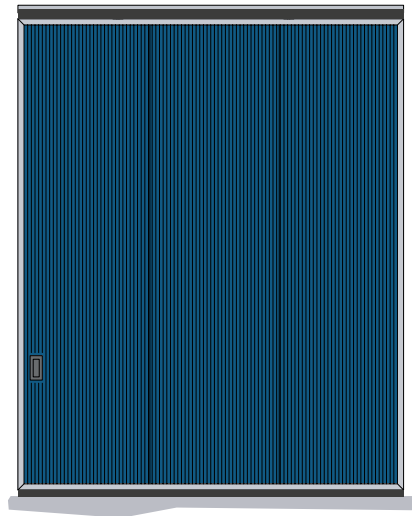

Options for SPD 100 ISO+ doors

- > food-safe coating (HACCP)
- > stainless steel bottom guide – prefab concrete sills
- > profiles coated to your own colour
- > EPS freeze cell panels

*Our basic profile:
option of top roller with lower profile,
adjustable and for every door width:*

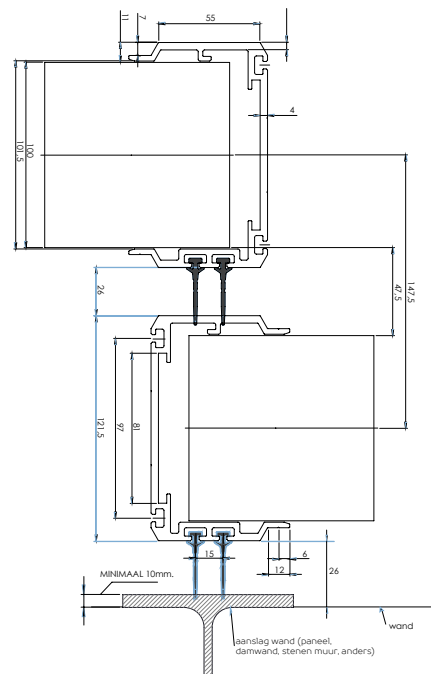

SPD 100 ISO+ | 100 mm
from 3 x 3 up to 6 x 9 m (W x H)

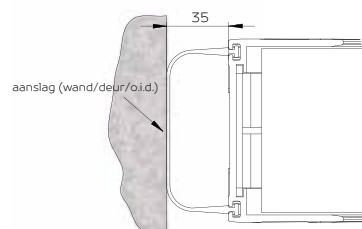

Aluminium u profile frame, rubber sealing and 100-mm panels

sealing along the side between two sliding doors and the wall join

top end sealing

SDWD 60

Sliding trapezoidal sheet door

A robust tubular frame forms the basis for the trapezoidal sheet door. The trapezoidal sheet is screwed into the frame to the required colour. The doors are made with top rollers and fitted as standard with a bottom guide by means of plastic boats.

Benefits for you

- > trapezoidal sheet style and colour corresponding to your premises
- > smart solution with respect to the cost price

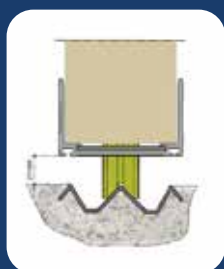

Standard finish and supplied incl.

- > rails & stoppers
- > (top) rails wheels
- > sunken hand grip
- > door assembly

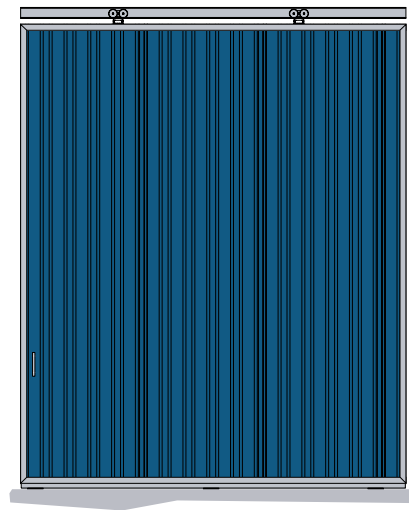

Options for SDWD doors

- > rain cover
- > bottom roller design
- > anti-draught brushes all round
- > pin locking (ground)
- > glass section
- > trapezoidal sheet installation types: mounted in or on the tube
- > tubular frame coated in any RAL colour desired

*Our basic profile:
option of top roller with lower profile,
adjustable and for every door width:*

SDWD 60 | 60 mm
from 3 x 3 up to 5 x 6 m (W x H)

Tubular 60 x 60 mm frame with 35-mm trapezoidal sheet

SVLD 60

sliding ventilation slatted door

With ventilation doors it is important that you get sufficient air into your barn. But what is more important is that you can control the quantity and direction of the airflow. This otherwise occurs only with a roller shutter. We have adjustable vertical slats, using which you can control the airflow into your barn in a particular direction.

Benefits for you

- > quantity of air to be controlled through roller shutter
- > vertical airflow to be controlled by rotating slats and closing sections
- > extremely effective air control especially with barns for young livestock
- > slatted door placed on panel sliding door

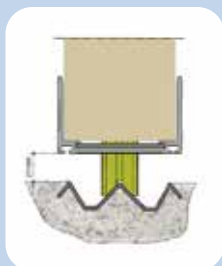

Standard finish and supplied incl.

- > manually operated roller shutters to colour
- > rails & stoppers
- > (top) rails wheels
- > surface-mounted hand grip
- > door assembly
- > manually operated slats

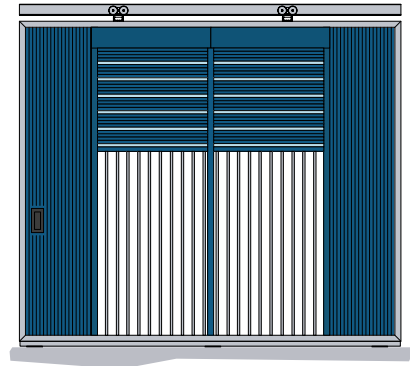

Options for SVLD 60 doors

- > motor-powered roller shutters **connected to your barn ventilation**
- > made completely with slats over the entire width of the door
- > inside fitted with bird mesh, made in stainless steel as option
- > air intake door (surface-mounted) for indirect air control
- > bottom roller design
- > contra-rotating valve system

*Our basic profile:
option of top roller with lower profile,
adjustable and for every door width:*

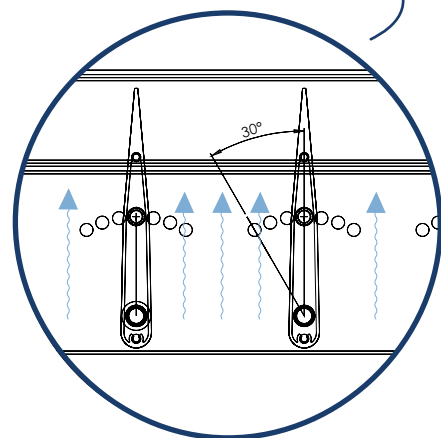

SVLD 60 | 60 mm
from 1 x 2 up to 4 x 4 m (W x H)

On the basis of an SPD60 sliding door:
U profile 66 x 50 mm with panel 60 mm.

*Unique:
airflow can be regulated by
adjustable slats*

SWBGD 60

sliding windbreak mesh door

Windbreak mesh sliding doors are used in situations where natural barn ventilation is important. As, for example, in cow barns and storage sheds

Benefits for you

- > smooth sliding door with large mesh surface
- > quality windbreak mesh with clamping profile attachment
- > 70% wind reduction & natural ventilation

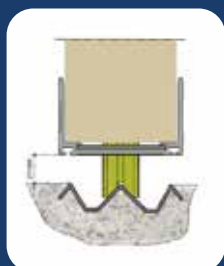

Standard finish and supplied incl.

- > rails & stoppers
- > (top) rails wheels
- > recessed hand grip
- > door assembly
- > anti-draught brush on side posts

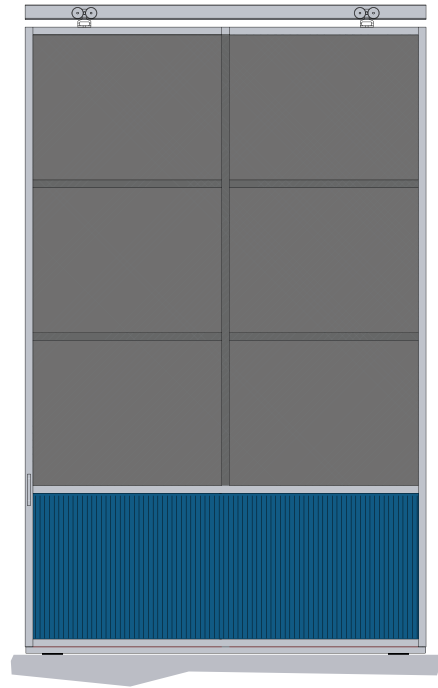

Options for SWBGD doors

- > bottom roller design
- > bottom guide (boats, wheels/embedded)
- > electrically powered
- > glass section
- > rain cover
- > cylinder lock
- > protective plate (stainless/aluminum/anti-slip)
- > wall brackets (types)
- > anti-draught brushes all round
- > profiles to colour (powder coating)
- > profiles in 304 stainless steel
- > panels to colour (sprayed on the basis of RAL)
- > pin locking (ground)
- > built-in wicket door
- > built-in cooling grating (with slide)

*Our basic profile:
option of top roller with lower profile,
adjustable and for every door width:*

SWBGD 60 | 60 mm
from 2 x 2 up to 5 x 5 m (W x H)

Based on a tubular 60 x 60 mm frame
with a u-profile 66 x 50 frame.

from 0.5 x 1.8 m
up to 2 x 4 m

colours

LPDS

Wicket panel door for dividing wall

Dividing wall doors are used in 60-mm panel walls. These doors can easily be installed when the walls are erected.

Benefits for you

- > sandwich PIR door leaf
- > rapid installation (to be included as walls are erected)
- > low maintenance

Standard finish and supplied incl.

- > plastic door leaf
- > wicket door lock
- > panel 40 mm
- > stainless steel hinges

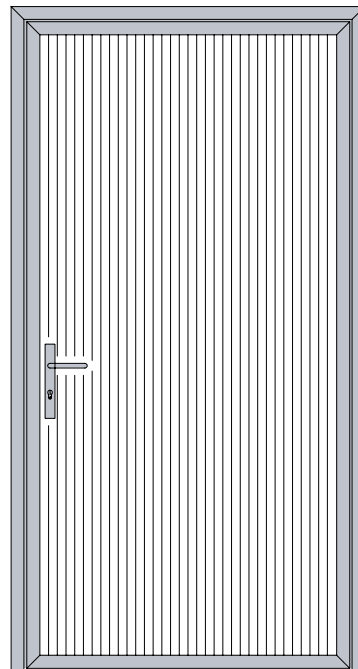

Options

- > cylinder lock
- > aluminium latch
- > door closer
- > storm chain
- > mechanical code lock
- > (plastic) window
- > surrounding frame
- > wind hook
- > plastic panel leaf

from 0.9 x 1.8 m

up to 1.3 x 2.5 m

colours

'colour' white or other RAL colours
available by agreement

LBD Wicket fire door

Beek Deuren also supplies steel fire doors. These doors resist fire for from 30 to 120 minutes and are extremely well suited to fire compartmentalisation.

Benefits for you

- > fire-resistant 30 up to 120 minutes
- > robust steel design
- > low maintenance
- > anti-scratch powder coating,
- > 2 standard sizes in stock.

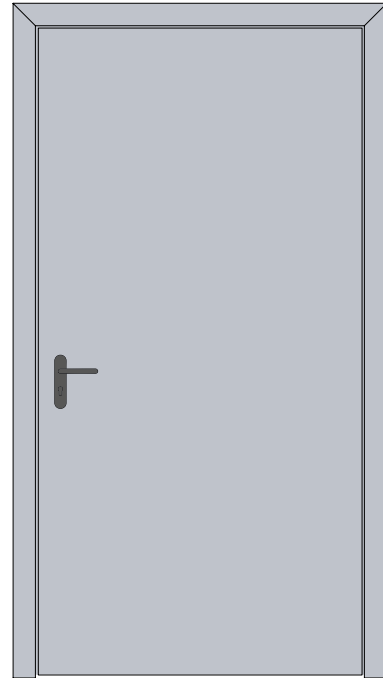

Standard finish and supplied incl.

- > fittings
- > sill

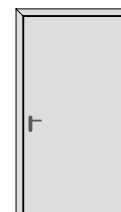

Options

- > observation window
- > panic lock
- > door closer
- > plastic hand grips

LBD | 40 mm
from 0.9 x 1.8 m

colours

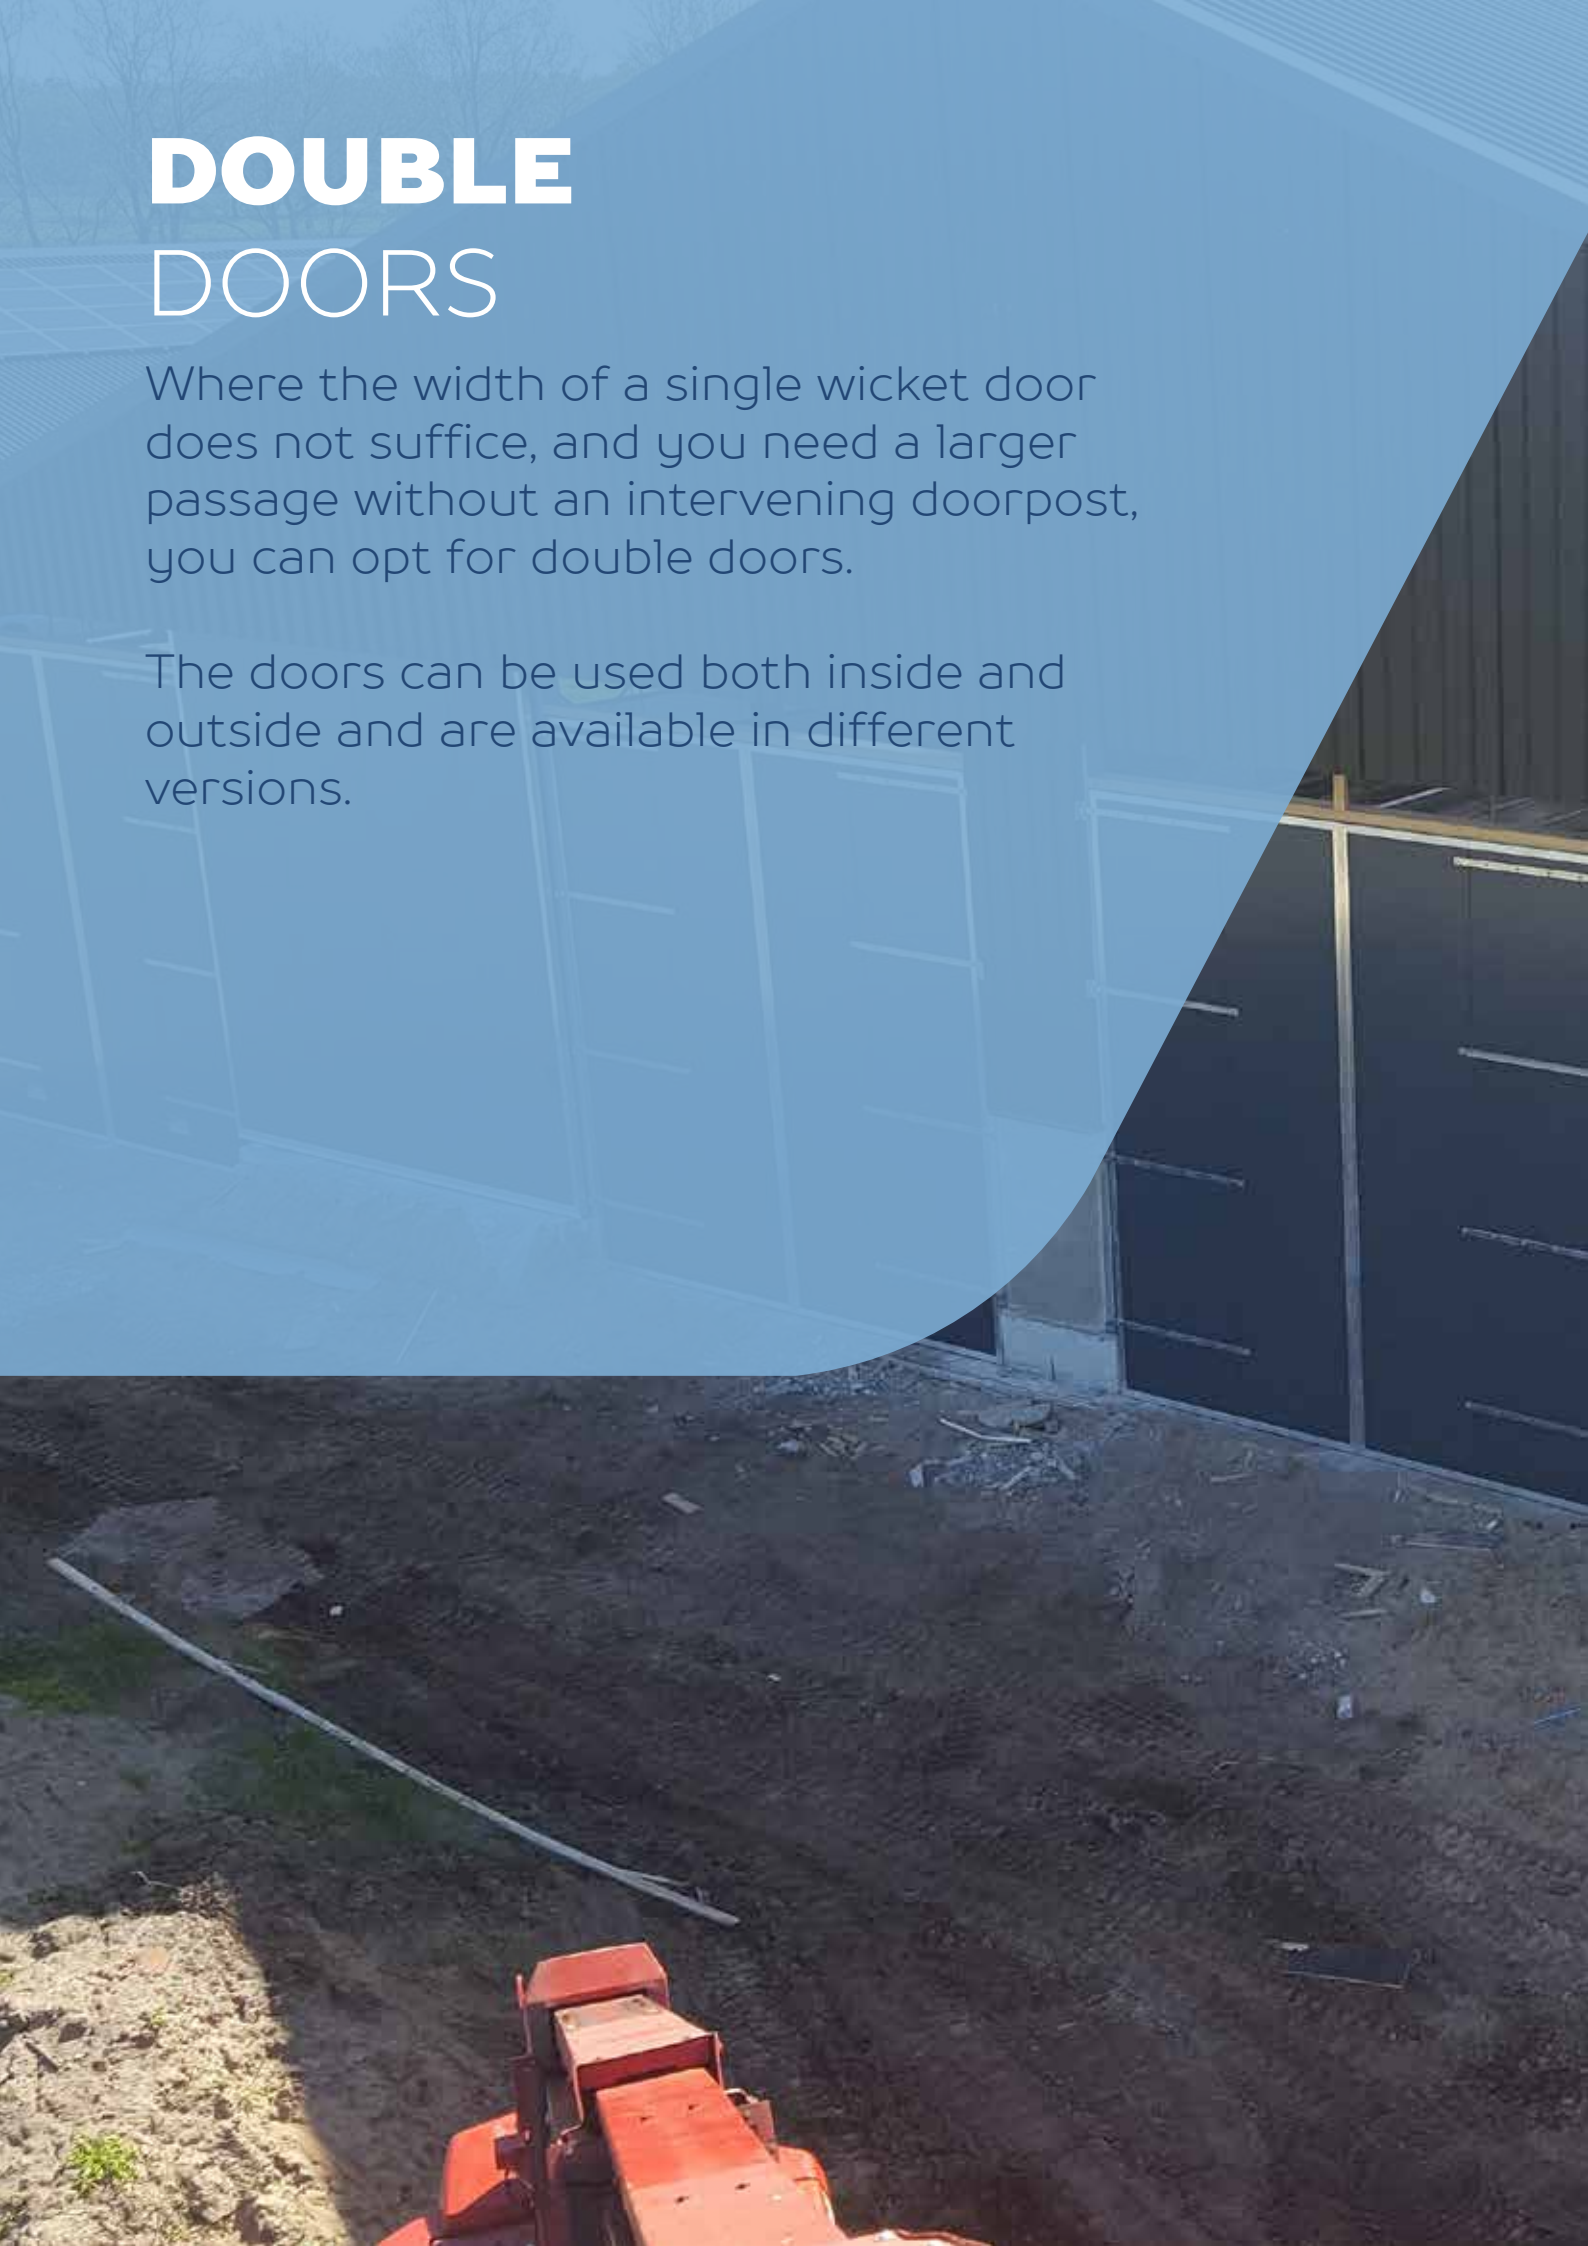

RAL 9002

DOUBLE DOORS

Where the width of a single wicket door does not suffice, and you need a larger passage without an intervening doorpost, you can opt for double doors.

The doors can be used both inside and outside and are available in different versions.

*Questions about double doors?
phone or mail us!*

+31 (0)6 39 19 48 70 – info@beekdeuren.nl

LPDK-D

Double wicket panel door

Beek Deuren supplies double wicket doors for application both inside and outside. The wicket doors can be fitted with a simultaneously locking cylinder lock, glass window with glazing as required, ventilation gratings, code locks and aluminium profiles that can be coated in any desired colour.

Benefits for you

- > robust aluminium frame
- > robust rubber sealing

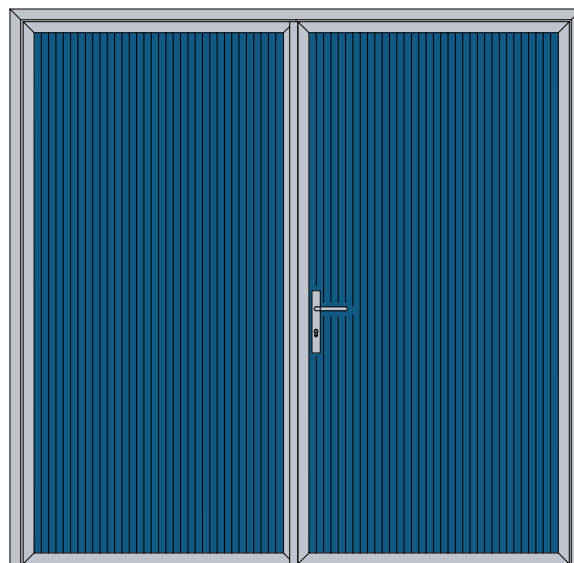

Standard finish and supplied incl.

- > aluminium latch
- > cylinder lock
- > panel 40 mm
- > stainless steel hinges

Options for LPDK

- > door closer
- > storm chain
- > mechanical code lock
- > (plastic) window
- > surrounding frame (overlay)
- > wind hook
- > internal locks
- > glass window(s)

LPDK-D | 40 mm
up to 3 x 3 m

other RAL colours on request

DDH Double door gate hinges

double gate hinge doors are a simple solution for larger door surfaces.

Benefits for you

- > simple and robust product
- > low maintenance

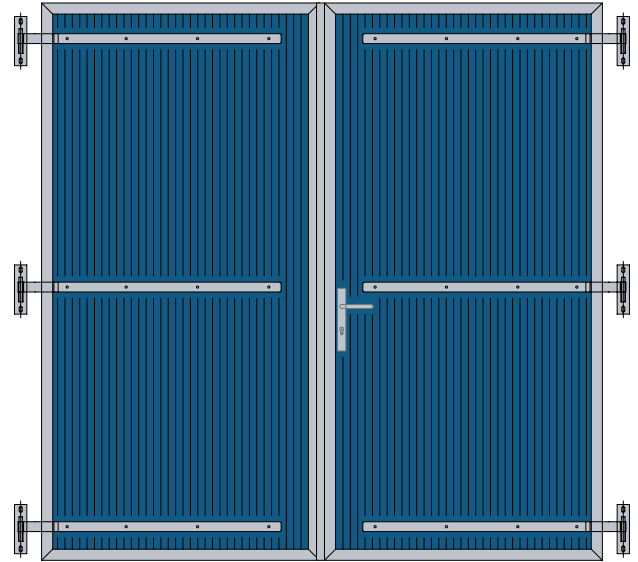

Standard finish and supplied incl.

- > recessed gate hinges 600 mm including screw-on hinge plates.
- > single pin locking

Options

- > constructed airtight with corners and rubbers
- > double pin locking
- > farmer's latch set
- > lock with handle set
- > offset gate hinges
- > flat gate hinges
- > stainless steel container lock

DDH | 40 mm
up to 3 x 3 m

other RAL colours on request

LPDL-D

Upmarket double door

The LPDL-D wicket doors are insulated wicket doors. These wicket doors are often used in upmarket barns & production halls. An attractive solution as access door and in the same style as your other (current) doors.

Benefits for you

- > maintenance-free and hardwearing
- > upmarket appearance

Standard finish and supplied incl.

- > aluminium fittings
- > cylinder lock
- > robust plain aluminium
- > stainless steel hinges
- > sandwich panel
- > 22-mm insulation glazing

Options for LPDL

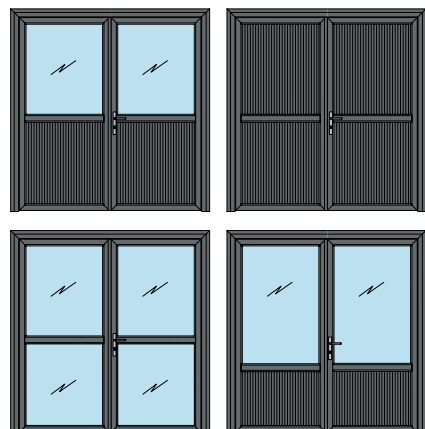

- > door closer
- > storm chain
- > laminated glazing 16 mm
- > frame and door to colour
- > fully glazed
- > code lock
- > customised glazing and panel heights

SPECIALS & PREFAB

Apart from our standard range, Beek Deuren is also happy to provide customised solutions. In this regard, we think along with you as the customer to arrive at a suitable solution that fully meets the requirements & wishes set by you.

This order consisted of supplying & installing sliding doors, including glazed sections for a mobile worksite cabin.

Prefab sheds, storage rooms and hygiene locks are also part of the Beek Deuren product range. The simple prefab design ensures a rapid and cost-effective construction method.

PANEL TYPES

You will find our standard range of panel types here. Apart from the standard range, a lot more can be provided on request. Ask our sales staff for the relevant materials and choices in colour/relief.

MICRO profiling

FIRE SAFE

This panel can be supplied in fire-retardant (B-S2-D0) or fireproof design

AGRI COATING

Can be supplied with agri coating – this coating has been developed for long service life in agricultural applications

STORAGE+

For this panel, a design is available that has been specially developed for potato storage sheds.

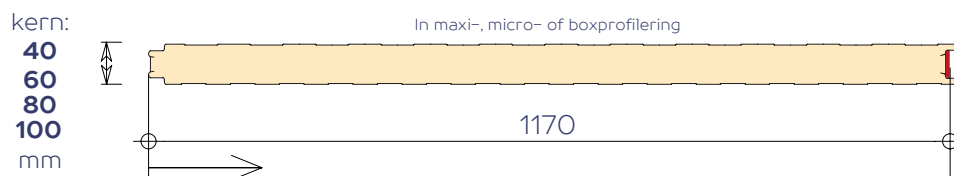

FOOD-SAFE

Can be supplied in a design applicable in the food sector.

Beek Deuren B.V. is part of the company headed by René Beek which also includes Beek Montage B.V. and Beek Agri B.V.

This means a great deal of in-house knowledge and experience in the agricultural and industrial markets.

Beek Montage is strong in roof and wall sheeting. It also works in renovation, conversion and newbuild.

Beek Agri provides durable solutions for the poultry market, in the shape of windows that can be darkened, free range hatches and complete winter gardens. Dealer and installer of Chore-Time aviary systems in this regard.
